## Snapshot of New York's

## HEAD START PROGRAM

Head Start provides children and their families with opportunities that promote their physical, social, emotional and cognitive development, enabling them to reach their full potential in school and life.

I was a Head Start Parent, 33 years ago, when my youngest child attended Head Start. One day a staff member invited me to attend a 20-week parenting workshop. What I learned was that Head Start is a program that educated my child, but also the family. The training helped me to be a better parent of my three daughters.
